WASH

BUCKETS

Essential Car Wash Bucket for Effective Cleaning

Available in:   

WS 041

WS 045

WS 042

Made from durable HDPE material

Metal handle for easy transportation

Maximum capacity of 20 litres

Convenient measurement marking on the side

The DETAILING BUCKET – is the essential tool you need for a professional car wash. Made from durable high-density polyethylene (HDPE) material, this bucket is built to last. With convenient measurement markings on the side, you can easily pour in the right amount of water for each wash, without wasting a drop.

BUCKET

The ultimate professional grade 20 litres bucket designed specifically for washing car.

Available in:

WS 047

BUCKET LID

The screw-on lid guarantees a tight and secure fit. It is made of high-quality HDPE plastic.

WS 039 / 040

SEPARATOR

Available in: ● ●

This innovative product is designed to separate dirt and debris from clean water, ensuring that your cleaning solution stays effective for longer.

When washing your car with a glove or sponge, simply rinse it in the bucket equipped with our separator. As the dirt settles at the bottom, it won't mix back into the clean water.

WS 116

HANGER

The BUCKET HANGER attaches effortlessly to the side of any bucket and accommodates various brushes, gloves, and other detailing tools.

This tool organizer for buckets is designed to optimize functionality and ease of use.

WS 123

BUCKET DOLLY

Equipped with five durable wheels that rotate 360 degrees, it allows for easy pushing, pulling, and moving the bucket in any direction. Thanks to its excellent maneuverability, the cart remains stable even with a full bucket and glides smoothly over uneven surfaces like cobblestones, grass, or gravel, making it perfect for outdoor use. Two of the cart's five wheels are equipped with brakes to prevent accidental movement, especially on sloped terrain.

WS 124

BUCKET DOLLY ADAPPTER

BUCKET DOLLY ADAPTER is an aluminum connector that allows two dollies to be combined into one cohesive set. This enables the simultaneous transport of two buckets, significantly streamlining the vehicle washing process, especially when using the "two bucket" method.

WS 049

STORM

Wash

Designed to speed up the car washing process. Crafted from delicate and dense microfiber. It is guaranteed to leave no scratches on vehicle's varnish

WS 050

HURRICANE

Wheel

Specialized rim cleaning glove. With a large washing surface and high absorbency, it makes cleaning rims quick and easy.

WS 095

BREEZE

Interior

Perfect for cleaning all kinds of surfaces in your car - including plastic, rubber, leather and upholstery. It stays securely on your hand.

SCRUBBER PAD

Interior

WS 135 / 136

Available in: **1** **3**

Dimensions: 13 x 8 cm

Grammage: 840 gsm / 320 gsm

Efficient cleaning of plastic, rubber, leather

Made from Korean microfiber

It's perfect for tackling even the dirtiest cars with ease. Gentle on your car's finish and highly effective at removing dirt and grime. On one side it features a modern fiber with exceptional cleaning properties, and on the other a traditional microfiber. It's perfect for quick and efficient cleaning of plastic, rubber or leather upholstery. Its unique design allows for the safe removal of even the toughest dirt from all structural surfaces.

WS 137

PURE VIEW

Glass Mitt

PURE VIEW is a microfiber glove with a double-sided structure, designed for the care of glass surfaces and more. It does not shed, nor does it leave microfibers or streaks on the cleaned surface. Thanks to the high-quality yarn used in its construction, it offers high water absorption and maximum product durability.

The glove is edged with two types of microfiber. One side features a waffle structure, intended for preliminary cleaning using a glass cleaner. The other side has a smooth surface, ideal for final polishing of glass, ensuring uniform cleaning without streaks.

Ideal for internal window surfaces

Easy access to difficult areas

No streaks

Dimensions: 21 x 17 cm

WS 051

TYPHOON

Wash Pad

Featuring a large washing surface and exceptional absorbency, this wash pad is perfect for tackling even the dirtiest cars with ease. Its ergonomic shape ensures a comfortable grip, while its microfiber material is both gentle on your car's finish and highly effective at removing dirt and grime.

ALBINO

Prewash / Interior / Leather

The ultimate tool for achieving a professional level of cleanliness for your car or motorcycle. With its soft synthetic white bristles, this versatile brush gently and effectively cleans your vehicle's interior, leather, and prewash areas without scratching or damaging any surfaces.

Available in: 
4 sizes: 16/24/30/40 mm
set 3 pack: 16/24/30 mm

WS 013 / 014 / 015 / 016 / 103

ORANGE

Prewash / Interior / Leather

The ALBINO ORANGE car detailing brush is a versatile and effective tool designed to maintain the cleanliness and appearance of your car's interior. Made with gentle synthetic bristles, this brush is perfect for pre-wash and reaching hard-to-clean areas like leather decorations and the steering wheel.

Available in: 
4 sizes: 16/24/30/40 mm
set 3 pack: 16/24/30 mm

WS 117 / 118 / 119

SHORT

Rims / Prewash / Interior

The most versatile brush in our lineup with bristles that are now even shorter for better cleaning action and foaming power. This brush is perfect for cleaning rims, prewash, and car interiors. The black varnished plastic handle and natural/synthetic bristles are designed to absorb chemicals for a more efficient cleaning process.

Available in:
3 sizes: 16/24/30 mm

WS 075 / 076 / 078

GREY

Rims / Engine / Interior

With its high cleaning power and increased bristle softness, it's perfect for pre-washing and cleaning rims, as well as more delicate work on the interior of your car, such as cleaning leather elements.

The detailing brush has a handle made of varnished plastic, providing a comfortable grip for precise control while cleaning. The synthetic bristles are gentle on surfaces, making it ideal for use on the rims, pre-wash, and car interior.

Available in:
3 sizes: 16/24/30 mm

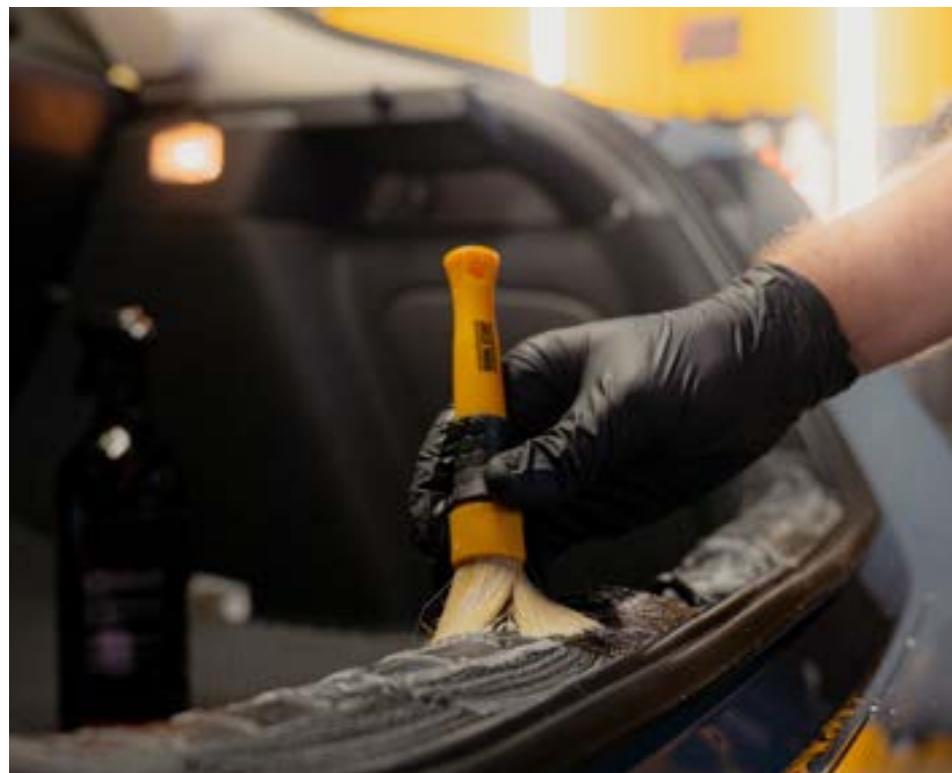

DETAILING BRUSH

ULTRA GRIP

Available in:
2 sizes: 22/24 mm 

The brushes are equipped with a new ergonomic handle with a non-slip finish. This ensures excellent control and comfort even in difficult conditions. Available in three versions: Classic, Albino and Black.

CLASSIC

Rims / Prewash / Interior

WS 160 / 161

The most versatile brush in the WORK STUFF range. Indispensable for cleaning rims and exterior details, as well as for interior care. The combination of natural and synthetic bristles effectively removes dirt while protecting the surfaces being cleaned.

BLACK

Rims / Engine / Interior

WS 162 / 163

The brush with the highest cleaning power in the series. Designed for removing heavy dirt from rims, sills, recesses, and the engine compartment. Hard synthetic bristles ensure effectiveness where other brushes fail.

ALBINO

Prewash / Interior / Leather

WS 164, /165

A brush designed for maximum gentleness and precision. Ideal for safely cleaning the most sensitive surfaces both inside and outside the vehicle. Perfect for pre-washing and for caring for leather and decorative elements.

WS 078 / 079

ULTRA SOFT

Interior

This brush is specifically designed with ultra-soft synthetic bristles to ensure gentle yet effective cleaning without causing any damage to your precious vehicle's paintwork.

With their ergonomic design and flexible bristles, these brushes effortlessly remove dust, dirt and grime from the tightest corners and delicate areas, leaving your car looking brand new. Unlike traditional brushes that can leave behind scratches, these ultra soft detailing brushes gently lift away contaminants without leaving a trace.

Available in:
2 sizes: 20/23 mm

WS 104 / 105 / 106 / 073

STIFF

Wheels / Engine / Exterior

Brush designed to tackle even the most stubborn grime with ease. With its hard bristles and resistance to strong chemicals, our brush is the perfect choice for all your tough cleaning needs.

Whether you're dealing with persistent dirt on your car's exterior or grease buildup in the engine bay, our Detailing Brush STIFF is up to the task.

Please note that this brush should not be used on scratch-prone surfaces, such as car bodies, piano black elements, piano black rims or gloss black.

ZEPHYR

Glass

A top-quality waffle weave microfiber towel perfect for cleaning car windows and other glass surfaces. The unique waffle structure of this towel ensures that it leaves no scratches, streaks or stains on the glass surface. Made from highly absorbent microfiber material, it effectively absorbs excess water from the cleaned surface. The towel's compact size and density of 400g/m² make it perfect for hand cleaning upholstery and other interior car surfaces.

Available in: **1** **3**

WS 032

MAGNETO

built-in magnets

MAGNETO Microfiber is the ultimate solution for preventing water stains on your car's paintwork. With its high-quality microfiber towel and built-in magnets, you can easily place it under the mirror or in any other trouble spot. The water will flow directly into the microfiber, not onto the varnish, keeping your car looking its best. The special magnets inside the microfibers make it easy to place both horizontally and vertically. Each package contains two fibers, one for each mirror. Magneto is safe for the paintwork and provides high absorbency to ensure a thorough cleaning.

WS 134

ROLL MICROFIBER

Care / Cleaning

ROLL MICROFIBER is a practical roll containing 50 gray microfiber cloths. These are high-quality, versatile microfiber cloths designed for car detailing – ideal for paint care, interior cleaning, windows, and plastic parts. The microfiber cloths are soft and safe for all car surfaces, leaving no scratches and no dust. The roll is a convenient and economical solution – you always have a large number of fresh microfiber cloths ready to use at your fingertips.

Density: 220 g/m²

Size: 30 × 30 cm

Soft fibers

They don't produce dust and don't leave scratches.

PRO WOOL PAD

Polishing Pad

PRO WOOL is a polishing pad made from 100% sheep's wool. Between the wool and the hook-and-loop fastener, there is an open-cell, soft layer, which ensures more stable operation and reduced vibrations. The low temperature during polishing allows for more aggressive work, resulting in better paint correction.

The increased cutting power is also due to its short, bristled wool fibers. PRO WOOL provides very good ventilation, reducing the risk of burning the paint. As all wool products tend to shed fibers, it is recommended to thoroughly blow out the pad with compressed air and properly condition it before the first use. This will help avoid shedding fibers during work.

CLAYS

06

Designed with a durable polymer layer, this mitt can be used multiple times and effectively eliminates tough contaminants such as tar, resin, and insect marks. Its ergonomic design allows for easy maneuvering and use on even the most intricate surfaces. To use the CLAY MITT, simply wash your vehicle, soak the mitt in water or shampoo and water solution, move it across and along the surface with light pressure, and rinse the mitt regularly. After use, wash and dry your vehicle.

WS 074

CLAY MITT

Clays

This versatile tool effectively removes stubborn contaminants such as tar, resin, and asphalt, along with other dirt that traditional cleaning methods cannot handle. This helps prevent scratches in your paint job and ensures that your polish and wax work more effectively. Additionally, using a clay bar helps maintain the integrity of any protective coating you apply to the finish and keeps your car's surface clean and free of impurities. Our CLAY BLOCK is a durable polymer-layered sponge that's perfect for achieving a smooth, spotless finish every time.
